

a Frozen models on an independent bulk cohort

GSE7621: 9 control, 16 PD; trained only on the 63 laser-capture people
core classifier AUC 0.94 (95% CI 0.82–1.00), label shuffles $P = 0.0003$

b More than neuron loss

	AUC
neuron markers alone	0.90
core classifier	0.94
core, neuron content removed	0.79
panel forest, neuron content removed	0.74
neurons alone, leave-one-out	0.87
neurons + core score, leave-one-out	0.90

c Every Boruta gene: effect in the laser-capture cohort and in GSE7621
